›› 1/6 CAD-PLAN PRINT SERVICE DEFINITION:

> Only plans, technical drawings, drafts, maps and line graphics with a binding cutting frame are processed in the CAD plotting service.

> For templates such as photos, pictures, posters, full-color graphics, family trees, etc., please select a different product group.

> Scaling or format adjustments are not possible.

> The calculation basis is always the page format of the PDF file!

›› 2/6 IN WHICH FILE FORMAT SHOULD THE DATA BE SAVED?

> Printable PDF file (preferably PDF/X4)

> Fonts fully embedded, alternatively converted to paths

> No transparencies

> No comments and form fields

> No layers

> No password protection

›› 3/6 IN WHICH COLOR SPACE SHOULD THE DATA BE SAVED?

> Black/greyscale

> RGB

> CMYK

> No special colors (e.g. HKS, Pantone)

» 4/6 **HOW SHOULD I CREATE MY DOCUMENT?**

> In final size

> Create cutting frame (min. 5 mm distance to the drawing content)

> Create plan header at the bottom right [in accordance with the EN ISO 7200 standard, design of title blocks (drawing headers) on technical drawings, these are located at the bottom right]

> Do not use cutting or register marks
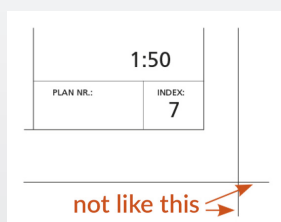

> Do not create areas as pattern/grid areas

REPRO⟩ONLINE.EU

⟫ 5/6   ZIP-ARCHIVE:

> Only compressions or archives in the „ZIP" standard with the extension *.zip and *.rar are permitted (but NO *.7z, *.gz, *.arc or other compression methods). Subfolders in the ZIP archive are possible.
> Please name files uniquely. If files with the same file name are uploaded, they will be renamed automatically (consecutive numbering appended).

⟫ 6/6   MISCELLANEOUS:

> Fold marks, text and drawing content between drawing content and cutting frame may be omitted for production reasons.

> The same color values can be reproduced differently on different print materials. Special colors are simulated in CMYK and do not always correspond to the original tone.

> No guarantee is given for the correctness or completeness of text and image content. A spell check does not take place.

> All files in an order must have unique file names. Capitalization is not a clear distinguishing feature.
> Unambiguous is: Plot1.pdf and Plot2.pdf but not plot1.pdf and PLOT1.pdf!
